

# REPLACING YOUR SLIDING GLASS DOORS WITH FRENCH DOORS

Use our measure guide to measure your sliding glass door when you're ready to upgrade it to a French door! Print this measure guide and record your measurements in inches. Measure the width across the entire sliding door, touching the outside stucco closest to the metal frame. The height can be rough measured by just measuring from bottom track to touching the stucco at the top. In addition to this measure guide, please take and bring a few pictures of your door as well! For all door orders, our in-house, licensed contractor will remeasure for accuracy after a 50% deposit has been completed. Grab a measuring tape, open your door and start measuring!

- 1** Width of the sliding glass door. \_\_\_\_\_ inches  
Measure the width across the entire sliding door, touching the outside stucco closest to the metal frame.

- 2** Height of the sliding glass door. \_\_\_\_\_ inches  
Measure from bottom track to touching the stucco at the top.
